

Nothing beats
THE RATT
for rapid aerial surveillance

As special events with large crowds and critical incidents continue to grow in our communities, you need a cutting-edge solution to rapidly deploy aerial surveillance, get control of the situation and help deter crime.

Hitch Mount

CONNECT

- Takes one person 5 minutes to set up and goes anywhere
- Compatible with ANY kind of vehicle that has a 2" hitch receiver

Tripod Mount

ELEVATE

- Get surveillance cameras elevated 15-35 feet in under 2 minutes and can be used on uneven terrain

Wall Mount

DEPLOY

- Provides rapid aerial surveillance, day or night, with local and/or remote control via any ONVIF Cloud VMS on uneven terrain
- "MIL-STD-810F" Approved masts overcome disappointing limitations of most drones such as battery life, flying in rain or wind and no-fly zones
- Not just for cameras – deploy radio antennas, signal boosters, lighting, outdoor WiFi, PTP links, environmental sensors and more!

THE RATT

The ultimate in response flexibility!

Telescoping Mast: Reach up to 35' in under 2 minutes

Pump: Use hand pump or electric pump to raise mast in seconds

Payload: Devices are quickly loaded/unloaded by removing the handle and lowering mast away from vehicle

Terrain Adjustable: Deploy on uneven terrain and adjust mast vertically via in-built bubble level

Mounting: Safely connect to a 2" hitch receiver in seconds

Rugged Wheels: Effortless transport on various terrains and from vehicle to vehicle
